

Alpha₁ Proteinase Inhibitors

Policy # 00904

Original Effective Date: 01/01/2025

Current Effective Date: 01/01/2025

Applies to all products administered or underwritten by Blue Cross and Blue Shield of Louisiana and its subsidiary, HMO Louisiana, Inc. (collectively referred to as the “Company”), unless otherwise provided in the applicable contract. Medical technology is constantly evolving, and we reserve the right to review and update Medical Policy periodically.

When Services Are Eligible for Coverage

Coverage for eligible medical treatments or procedures, drugs, devices or biological products may be provided only if:

- *Benefits are available in the member’s contract/certificate, and*
- *Medical necessity criteria and guidelines are met.*

Based on review of available data, the Company may consider the following alpha₁ proteinase inhibitors, including, but not limited to Aralast NP^{®‡}, Glassia^{®‡}, Prolastin-C^{®‡}, and Zemaira^{®‡} to be **eligible for coverage.****

Background/Overview

The alpha₁ proteinase inhibitors mentioned in this policy (Aralast NP, Glassia, Prolastin-C, Zemaira) are approved by the Food and Drug Administration for the treatment of clinically evident emphysema due to severe alpha₁ proteinase inhibitor deficiency, also known as alpha₁-antitrypsin (AAT) deficiency. The products listed in this policy are covered at parity status. The lack of mention of a particular alpha₁ proteinase inhibitor does not insinuate that there is no coverage for that product.

Rationale/Source

This medical policy was developed through consideration of peer-reviewed medical literature generally recognized by the relevant medical community, U.S. Food and Drug Administration approval status, nationally accepted standards of medical practice and accepted standards of medical practice in this community, technology evaluation centers, reference to federal regulations, other plan medical policies, and accredited national guidelines.

The purpose of this policy is to reflect the coverage of the mentioned alpha₁ proteinase inhibitor products at parity status. It should be noted that these products are not targeted medical drugs. This Medical Policy is informational in nature only.

Policy History

Original Effective Date: 01/01/2025

Current Effective Date: 01/01/2025

11/07/2024 Medical Policy Committee review

11/13/2024 Medical Policy Implementation Committee approval. New policy.

Next Scheduled Review Date: 11/2025

****Medically Necessary (or “Medical Necessity”)** - Health care services, treatment, procedures, equipment, drugs, devices, items or supplies that a Provider, exercising prudent clinical judgment, would provide to a patient for the purpose of preventing, evaluating, diagnosing or treating an illness, injury, disease or its symptoms, and that are:

- A. In accordance with nationally accepted standards of medical practice;
- B. Clinically appropriate, in terms of type, frequency, extent, level of care, site and duration, and considered effective for the patient's illness, injury or disease; and
- C. Not primarily for the personal comfort or convenience of the patient, physician or other health care provider, and not more costly than an alternative service or sequence of services at least as likely to produce equivalent therapeutic or diagnostic results as to the diagnosis or treatment of that patient's illness, injury or disease.

For these purposes, “nationally accepted standards of medical practice” means standards that are based on credible scientific evidence published in peer-reviewed medical literature generally recognized by the relevant medical community, Physician Specialty Society recommendations and the views of Physicians practicing in relevant clinical areas and any other relevant factors.
